EDUCATION

De La Salle Lipa Lipa City
Bachelor of Science in Information Technology 2022 – 2026
Major in System Development
Best Thesis in System Development

WORK EXPERIENCE

Highly Succeed Inc. Mandaluyong City
Web Developer Intern Jan 2026 – April 2026

- Led the modernization and transformed a legacy Human Resource Information System (HRIS) into a scalable full-stack web application, reducing manual administrative processes by 60%.
- Engineered and optimized backend architecture and data pipelines, improving system response times by 40% and increasing data reliability.
- Collaborated with cross-functional teams to deliver production-ready features, contributing to a 30% faster development cycle through rigorous testing and UI/UX enhancements.
- Implemented responsive interfaces and system improvements, increasing user satisfaction and reducing recurring system issues by 50%.

PROJECTS

Peak 2026

- Built a Windows desktop application using C#/.NET 10 and WPF, integrating 2 AI providers Codex and Claude to centralize subscription usage, 5-hour and weekly limits, and reset countdowns in an interactive desktop overlay.
- Developed event-driven task monitoring displaying up to 8 recent Codex chats, combining file-system notifications with 5-second reconciliation checks to surface task activity, completion, and approval requests.
- Implemented sanitized local storage, usage-threshold alerts, and stale-data detection, validated through 94 passing automated tests covering provider mapping, notification deduplication, concurrent task events, and privacy safeguards.

Human Resource Information System 2026

- Built a full-stack HR platform for employee records, attendance, and payroll management, reducing administrative processing time by 70% and centralizing 50+ employee records.
- Designed secure RESTful APIs and role-based access control, enabling real-time workforce management and reducing manual data entry by 60%.

BusGo Modern Jeepney Tracking App 2025

- Real-time commuter platform: GPS tracking application supporting 7+ public transportation routes, processing 2,000+ location updates, and delivering live vehicle locations and ETA predictions.
- Smart ticketing and transit management: Modernized traditional commuting workflows, improving ticketing efficiency by 40% and significantly reducing passenger waiting times during peak rush hours.

ADDITIONAL

Technical Skills: Proficient in JavaScript, PHP, React, Node.js, MySQL, HTML/CSS, Tailwind CSS; Familiar with Python, Dart, Git, REST APIs, and Firebase
Certifications: AWS Cloud Technical Essentials; Developing Front-end apps with React – IBM
