SKILLS

Languages: JavaScript, PHP, Dart, C#, Python, HTML, CSS
Frameworks & Libraries: React, Node.js, Express.js, Flutter, Tailwind CSS, .NET
Databases & Cloud: PostgreSQL, MySQL, Firebase
Tools: Git, Figma, Claude Code, Codex

WORK EXPERIENCE

Highly Succeed Inc. Mandaluyong City
Web Developer Intern Jan 2026 – April 2026

- Modernized a legacy HRIS into a full-stack web application covering employee records, attendance, and payroll, cutting manual administrative processes by 60%.
- Designed secure RESTful APIs with role-based access control, centralizing 50+ employee records.
- Optimized backend architecture and data pipelines, improving system response times by 40% and data reliability.
- Collaborated with cross-functional teams to ship production-ready features, implementing responsive interfaces and system fixes that reduced recurring issues by 50%.

PROJECTS

Peak | C#, .NET 10, WPF | https://github.com/shirokuuun/Peak 2026

- Built a Windows desktop overlay that centralizes subscription usage, 5-hour and weekly limits, and reset countdowns across two AI providers (Codex and Claude).
- Developed event-driven task monitoring for up to 8 recent Codex chats, combining file-system notifications with 5-second reconciliation checks to surface task activity, completion, and approval requests.
- Implemented sanitized local storage, usage-threshold alerts, and stale-data detection, validated by 94 passing automated tests covering provider mapping, notification deduplication, concurrent task events, and privacy safeguards.

BusGo Modern Jeepney Tracking App | Flutter, Dart, Firebase | https://github.com/shirokuuun/B-Go_Capstone 2025

- Built a real-time commuter platform with GPS tracking across 7+ public transportation routes, processing 2,000+ location updates to deliver live vehicle locations and ETA predictions.
- Implemented conductor authentication with role-based routing, pre-booking and pre-ticketing flows, and QR ticket scanning validated against Firestore data.
- Added background geofencing for automatic drop-off detection, with trip lifecycle management, capacity validation, and thermal receipt printing.
- Optimized Firestore queries with composite indexes and security rules.

EDUCATION

Bachelor of Science in Information Technology Major in System Development
De La Salle Lipa | Best Thesis in System Development 2022 – June 2026
